Full Stack Developer

Highly motivated and hands-on Full Stack Developer with a solid background in **PHP, Laravel (OOP, queues/jobs/events, notifications), MySQL/MongoDB/Redis**, and modern JavaScript frameworks including **Vue.js / Nuxt.js and React.js / Next.js**. I offer strong backend development expertise, **API integration** experience (including **GraphQL**), and a deep understanding of scalable and maintainable system design. Passionate about **clean code, performance optimization**, and collaborative development using **Git** and modern **workflows**. Familiar with **CI/CD** principles and **continuously improving** my ability to implement them effectively. I am a **self-motivated** problem solver who approaches challenges analytically and thrives in team-based environments.

Skills

Backend: PHP, Laravel, OOP, Queues/Jobs, Events/Observers, Microservices, Event-driven

Databases: MySQL, MongoDB, Redis, Eloquent ORM

Frontend: Vue.js, Pinia, React.js, Next.js, Nuxt.js, Livewire, Tailwind CSS

Integrations: REST/GraphQL APIs, Firebase, PWA/Service Workers

Tools & AI: Git, Jira, Agile, Supervisor, Cloud Panel, Hetzner Storage/S3, Claude Code, Codex, Cursor

Work Experience

Payzec Remote, TR
FullStack Developer Aug 2023 – July 2025

- Co-developed unified payment platform (**monorepo**) with collaborator; implemented **Laravel** backend features including **queues/jobs (Redis), events/observers**, async transaction processing, and notifications (**Mailgun + Firebase Cloud Messaging**)
- Contributed to integration of 14+ payment gateways (PayTR, iyzico, Stripe etc.) via **Omnipay** abstraction; supported 3DS Secure, refunds, multi-currency, installments, secure card vaulting
- Built one-click checkout frontend with **Vue.js/Pinia** (real-time validation, custom components, async state management)
- Implemented **WooCommerce** payment gateway plugin with **RESTful APIs**; developed **Axios** wrapper (CSRF token, interceptors, error handling)
- Added abandoned cart recovery via **MongoDB/Firestore** real-time sync and **PWA/Service Workers** for offline push notifications

Energetisch.fit Remote, AT
FullStack Developer Oct 2024 – July 2025

- Resolved critical UI/data integrity bugs in therapy booking system (cart, PDF/email flows, improvement calculations)
- Optimized slow cron jobs and DB queries in high-volume system (20GB+ DB); added indexing and reduced execution times

- Migrated legacy file handling to **Laravel** Storage Facade + **Hetzner S3** sync jobs
- Implemented optimistic real-time UI updates with Livewire for cart/treatment states
- Refactored duplicated code to reusable **Livewire/Blade** components; configured Supervisor for queues

Alışgidiş

Frontend Developer

Istanbul, TR
Mar 2024 – Jul 2024

- Engineered high-traffic e-commerce features with **Next.js** (code splitting, image optimization, dynamic routing, skeleton screens)
- Converted pixel-perfect **Figma** designs to responsive reusable components (**Atomic Design**, Component Library)
- Managed advanced state/data with **Zustand**, **React Context API**, **TanStack Query/SWR** (real-time polling, memoization)

Patara Soft

FullStack Developer

Remote, TR
Nov 2023 – Feb 2024

- Developed modular admin panel frontend with **Blade/jQuery** (dynamic tables, filtering, **AJAX CRUD**)
- Implemented **i18n** multi-language support and **SEO** features (**semantic HTML**, dynamic meta tags)
- Built efficient image upload/management workflows

Kodlooper Yazılım

FullStack Developer

Sakarya, TR
Aug 2022 – Feb 2023

- Developed/maintained web apps using **Nuxt.js**, **Vue.js**, **React.js** (**SSR/SPA** architectures)
- Implemented scalable client-side **state management** with **Vuex/Redux** Toolkit
- Integrated/consumed **GraphQL** and **RESTful APIs**

Education

Anadolu University

Associate's in Computer Programming

2022–2024

Eskişehir Osmangazi University

Bachelor's in Civil Engineering

2017–2021
